

BEAWARE consortium and the International Conference on Aerospace sciences AEROSPATIAL 2014

Alexander Norta

The 3rd BEAWARE Workshop, held at National Institute for Aerospace Research “Elie Carafoli” – INCAS, Bucharest, ROMANIA, on the 16th – 17th of September 2014 and on the 18th and 19th the International Conference on Aerospace sciences AEROSPATIAL 2014, organized also at INCAS.

The agenda of the workshop included organized visits to some of the most prestigious aerospace organizations in Romania: INCAS – National Institute for Aerospace Research “Elie Carafoli” is the leading research establishment in aerospace sciences in Romania; COMOTI - Romanian Research & Development Institute for Gas Turbines, and ROMAERO - the largest company in the Romanian Aerospace Industry. It also included a mentoring session - Aerospace Springboard – that enabled the participants to have discussions with aerospace experts coming from BEAWARE consortium.

The Romania event (http://beaware-aero.eu/information/?event_id_1=19) was in preparation of an EU-project that is about IoT and that involves drones - **Architectures, Platforms and Methodologies for Managing Connected Smart Objects**. The idea was to get consortium partners from Romania and that is why I attended the free one-day conference.
