

Osalemine konverentsil Baltic DB&IS'2014

Jüri Vain

Esitasin artikli ja esinesin ettekandega teemal "Provably Correct Test Development for Timed Systems"

The Baltic conference on databases and information systems is an international forum among researchers and developers of databases and information systems. The purpose of this conference series is to bring together researchers, practitioners and PhD students in the fields of advanced database and IS research, and provide an environment to exchange research findings and ideas on the matters, where development of reliable and sustainable systems, with data in the central role, has become crucial in modern diverse IS engineering. The conference will feature original research and application papers on the theory, design and implementation of today's information systems on a set of themes and issues.
