

**16th Nordic-Baltic Conference on Biomedical Engineering, 16. NBC & 10. MTD 2014
Joint Conferences**

Yar Muhammad

Conference: 16th Nordic-Baltic Conference on Biomedical Engineering, 16. NBC & 10. MTD 2014 Joint Conferences, Gothenburg, Sweden, October 14–16, 2014

The paper title was: Development of a Bio-Impedance Signal Simulator on the basis of the Regression based Model of the Cardiac and Respiratory Impedance Signals.

It gave me a great opportunity to present my recent research results in the Nordic Baltic Conference on Biomedical Engineering and Medical Physics 2014 (NBC'14).

The conference participants amounted to 430, this paper was selected as a finalist in the Young Investigator Award (YIA) competition for scientific contribution. The award was given by Springer and IFMBE in the conference.

Nevertheless, this event was special which was combined the IFMBE's Nordic-Baltic conference with the Swedish MTF (Svensk Förening för Medicinsk Teknik & Fysik) annual national meeting in biomedical engineering. Therefore, it gave me the opportunity to attend a larger and more vibrant congress.

Thank IT academy to support the trip.
