IEEE EDUCON Global Engineering Education Conference 2016

The theme of EDUCON 2016 conference is **Smart Education in Smart Cities.**

The IEEE Global Engineering Education Conference (EDUCON) 2016 is the seventh in a series of conferences that rotate among central locations in IEEE Region 8 (Europe, Middle East and North Africa).

The e-Learning 2015 conference aims to address the main issues of concern within e-Learning. This conference covers both technical as well as the non-technical aspects of e-Learning.

Main Conference Topics:

- Educational Methods and Learning Mechanisms in Engineering Education
- Infrastructure and Technologies for Engineering Education
- Use of ICT in Engineering Education
- Innovative Materials, Teaching and Learning Experiences in Engineering Education
- Applications in Smart Education

The conference proceedings will be submitted to IEEE Xplore®. Other indexing services evaluate conferences and independently determine what they will index.

English is the conference official language.

This conference gave a fresh overview of the engineering education in the world. It was very important for my doctoral thesis because topical themes were considered and discussed. Connections and friendship, which were made there are very useful for me. My presentation "Teaching Programming Basics for First Year non-IT Students "aroused the interest and after the session took place the discussion about programming for beginners. I got some interesting theories and opinions that can be taken into account in the Informatics course.
